

TUPAC Technical Assistance

Equity-Focused Quality Improvement Tools and Capacities

TUPAC seeks to implement principles of Continuous Quality Improvement as a foundational approach to identify and eliminate tobacco-related disparities to improve tobacco-related health outcomes of all New Mexicans. Equity-Focused Quality Improvement is a synthesis of the intentional implementation of tools and capacities that demonstrate the core values of the TUPAC Program and its strategic direction.

Tools and Capacities

Anti-Oppression: a framework for understanding how systems enable or contribute to disparities

Equity Lens Review: a self-assessment process for examining systems, programs and procedures to identify gaps or barriers

Continuous Quality Improvement (CQI): a process to identify and test specific ways to do better

Sustainable Change: making sure improvements will last

Together these equal

Equity-Focused Quality Improvement
